▣ SUMMARY

Passionate and self-driven Full Stack Developer with real-world experience building functional, responsive web apps. Solid understanding of both frontend and backend tech. Obsessed with clean UI, smooth UX, and efficient code. Always learning, always building. Open to **internships**, **freelance gigs**, and **collaborative tech projects**.

SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React, Vue.js, Next.js, Tailwind CSS

Backend: Node.js, Laravel, REST APIs

Databases: MySQL, MongoDB

Tools: Docker, Firebase, Git, Vercel, Postman

Concepts: Authentication Systems, RBAC, API Design, Data Integrity, State Management

🚀 PROJECTS

Vaultly — Digital Banking System

Live: <https://vaultlydemo.vercel.app> | Code: github.com/SlinkyCollins/vaultly-frontend

- Engineered a full-stack banking system with transaction-safe operations using database transactions, row-level locking, and retry strategies
 - Designed concurrent-safe deposit, transfer, and withdrawal flows ensuring data consistency under simultaneous requests
 - Built a Vue 3 SPA with route-level authorization and user-specific data isolation
 - Integrated Cloudinary for media handling and optimized build performance using Vite
- Stack:** Vue 3, Laravel, MySQL, Pinia, Sanctum
-

JobNet — Recruitment Platform

Live: <https://jobnet.vercel.app> | Code: github.com/SlinkyCollins/job-portal-frontend

- Developed a full-stack recruitment platform enabling job discovery, applications, and user management

- Implemented a dual authentication pipeline combining Firebase social login with MySQL-backed user records
 - Built salary normalization logic to enable cross-region compensation comparison
 - Containerized application using Docker for consistent development environments
- Stack:** Angular, PHP, MySQL, Firebase Auth, Docker
-

NairaNest — Financial System Simulation

Live: <https://nairanest.vercel.app> | Code: github.com/SlinkyCollins/Bank-App

- Built a financial system supporting atomic balance updates and secure transaction flows
- Implemented role-based access control (RBAC) and API rate limiting for secure operations
- Developed analytics dashboard for tracking income and spending trends

Managed application state using Redux Toolkit for predictable UI behavior

Stack: React, Node.js, MongoDB, Redux Toolkit

Phone OS Simulator

Live: <https://slinkycollins.github.io/Phone-App> | Code: github.com/SlinkyCollins/Phone-App

- Developed a browser-based mobile OS simulation using Vanilla JavaScript
 - Implemented app-level state isolation, USSD validation, and persistent local storage
 - Integrated Canvas API and Webcam API for interactive system features
- Stack:** JavaScript, Canvas API, LocalStorage
-

EDUCATION

B.Tech, Computer Engineering

Ladoke Akintola University of Technology (LAUTECH), Nigeria

2021 – Present

 **SOFT SKILLS:** Team Collaboration, Problem Solving, Fast Learner, Clear Communication.
